

GREENFIBER NATURAL FIBER INSULATION OFFERS THESE BENEFITS!

- Made from 85% recycled paper, produced from locally available raw materials
- Produced using 10 times less energy than other insulation products*
- Itch-free and formaldehyde-free
- Easy to install - can be applied over existing insulation
- Fills gaps and voids creating a seamless thermal blanket of protection
- Achieves any R-Value from R-13 to R-60
- Energy savings**
- Class 1/A Fire Rating
- Energy Star Partner
- Safe for your home and safe for the environment
- Free use of blowing machine with minimal bag purchase

*Comparison based on an R-19 at one-square-foot coverage area and includes production and energy used in the manufacturing process.

**Savings vary. Find out how in the seller's fact sheet on R-values. Higher R-values mean greater insulating power.
